

Goodbye is a difficult word. As we part ways there are many emotions of "goodbye" that come to the surface during the last days to months of life.

The adult butterfly is also called the imago, Latin for "image." As the imago spreads her wings, she realizes her new life form. She is free from the confines of the chrysalis, and the magnificent transformation is complete. As we witness the completion of your loved one's life cycle, allow the image of the delicate, yet vibrant butterfly to remain with you.
